ACRES CASHLESS CASINO LAUNCHES AT ROLLING HILLS CASINO & RESORT

Company's award-winning cashless solution now operating in 11 states

Acres Manufacturing Company (Acres), a leading casino loyalty and technology developer, today announced the launch of its Cashless Casino™ solution at Rolling Hills Casino & Resort in Corning, CA, delivering a seamless cashless experience to every slot machine on property. The deployment expands Acres' Cashless Casino footprint to 11 states and into the large North American tribal gaming market.

“Cashless gaming is proven to increase casino profitability by offering more funding options to players, who respond by increasing their visit frequency and time played at the casino,” said Noah Acres. “By offering the convenience of cashless gaming to its players, Rolling Hills solidifies its reputation as California’s Friendliest Casino.”

Named the 2023 Product Innovation of the Year by Gaming America, Cashless Casino enables casino operators to interface their slot machines and table games to any digital wallet or payment processor they select. Players use the casino’s mobile app to establish connectivity with the Bluetooth card reader installed on every game across the casino floor, ensuring funds are transferred to the correct game.

Cashless Casino is powered by Acres’ Foundation™ hardware, which is compatible with any modern slot machine and any casino management system.

Antonio Perez, General Manager of Rolling Hills, added, “Adapting to evolving player preferences and useful technological advances has become a necessary step in the casino industry and something we embrace at Rolling Hills Casino & Resort. In addition to enabling a fully flexible cashless gaming experience, Acres’ Cashless Casino allows us to provide cardless player ratings and a more frictionless player experience. The feedback we have received from our players has been tremendous, and it confirms what we already knew in that Acres and their Cashless Casino solution were the best choice for our property and players. Guests of Rolling Hills can now participate in true cashless gaming and the natural evolution of the player experience using the Rolling Hills Casino mobile app.”

ABOUT ACRES

Acres is a leading casino loyalty and technology expert. Acres' Foundation™ platform empowers casinos to modernize the casino player experience through granular, real-time slot data with cashless and bonusing capability to every slot machine. Acres was founded by John Acres, the inventor of casino systems technology. For more information on Acres and Foundation, visit <https://acresmanufacturing.com/>

ABOUT ROLLING HILLS CASINO AND RESORT

The Paskenta Band of Nomlaki Indians owns Rolling Hills Casino and Resort, which includes the Casino, four restaurants, two conference centers, a Brewery & Distillery, RV Park and Travel Center, The Equestrian Center at Rolling Hills, and The Links at Rolling Hills Golf Course. They employ over 600 team members, most of whom work full time with health care benefits and 401k options. Each year, hundreds of thousands of guests visit Rolling Hills Casino and Resort, bringing with them tourist dollars that benefit the local economy. The Casino and the Paskenta Band of Nomlaki Indians are strong community partners supporting local programs through generous grants and sponsorships.

The Paskenta Nomlaki Foundation donates hundreds of thousands of dollars to community organizations each year, with over \$9 million donated to benefit local health, safety and education programs. For more information visit www.rollinghillscasino.com.
